This activity is jointly provided by Annenberg Center for Health Sciences at Eisenhower and the American Academy of HIV Medicine, in collaboration with Postgraduate Institute for Medicine.

This activity is supported by independent educational grants from Gilead Sciences and ViiV Healthcare.

Keynote Speaker:

Wayne Parker, PharmD
Assistant Professor of Pharmacology
Alabama College of Osteopathic Medicine (ACOM)

Program Agenda

6:00PM – 6:15PM: Welcome, Introductions
6:15PM – 7:45PM: Keynote Speaker
7:45PM – 8:00PM: Q&A/Adjourn

Target Audience

This activity has been designed to meet the educational needs of physicians, physician assistants, nurse practitioners, and pharmacists; other healthcare providers, such as

nurses, nutritionists, social workers, and case managers are also encouraged to attend.

Statement of Need/Program Overview

Co-morbidities such as diabetes mellitus, insulin resistance, cardiovascular disease, and metabolic syndrome are on the rise among people with HIV. While it has not been discerned what is causing the increased risk for co-morbid disease conditions, it is most likely a combination of multiple factors. The first is the presence of the virus itself. HIV infection is associated with persistent inflammation. Among patients who are diagnosed with HIV late and have advanced disease, there are increased rates of complications, particularly AIDS-associated cancers. In the absence of antiretroviral therapy, ongoing inflammation predisposes individuals with adverse health outcomes. Similarly, treatment for HIV may also be a factor. Some antiretroviral medications are associated with toxicities that may contribute to increased risk of adverse events. Similarly, patients who have been on treatment for a long period of time also may experience toxicity due to years on treatment. Lastly, there are patient-specific and social factors. Some studies have demonstrated a higher rate of traditional risk factors such as cardiovascular disease risk associated with smoking, dyslipidemia, hypertension or diabetes among patients with HIV.

Educational Objectives

After completing this activity, the participant should be better able to:

- Incorporate into clinical practice recent advancements in the treatment, management and prevention of HIV disease
- Select ART regimens that balance the control of the virus with the potential for long-term side effects, particularly in older patients and those on ART for many years
- List novel agents for both treatment-naive and treatment-experienced HIV patients
- Explain the role that both resistance and adherence play in ARV therapy selection
- Optimize Pre-Exposure Prophylaxis regimens for the spectrum of patients wishing to prevent HIV infection
- Describe current research of HIV pipeline drugs in development to prevent, treat and possibly cure HIV disease

Physician Accreditation Statement

This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of the Annenberg Center for Health Sciences at Eisenhower and American Academy of HIV Medicine. The Annenberg

Center for Health Sciences at Eisenhower is accredited by the ACCME to provide continuing medical education for physicians.

Credit Designation

The Annenberg Center for Health Sciences at Eisenhower designates this live activity for a maximum of 2.0 *AMA PRA Category 1 Credits™*. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Pharmacist Accreditation Statement

The Annenberg Center for Health Sciences at Eisenhower is accredited by the Accreditation Council for Pharmacy Education as a provider of continuing pharmacy education.

Credit Designation

This program has been developed according to the ACPE Criteria for Quality and is assigned ACPE Universal Activity #0797-9999-21-042-L02-P. This program is designated for up to 2.0 contact hours (0.2 CEUs) of continuing pharmacy education credit.

For Pharmacists: Upon receipt of the completed activity evaluation form, transcript information will be sent to the NABP CPE Monitor Service within 4 weeks.

Type of Activity: Application

Continuing Nursing Education

The Annenberg Center for Health Sciences at Eisenhower is accredited as a provider of continuing nursing education by the American Nurses Credentialing Center's Commission on Accreditation.

Credit Designation

2.0 contact hours may be earned for successful completion of this activity.

Disclosure of Conflicts of Interest:

The Annenberg Center for Health Sciences at Eisenhower requires instructors, planners, managers and other individuals who are in a position to control the content of this activity to disclose any real or apparent conflict of interest (COI) they may have as related to the content of this activity. All identified COI are thoroughly vetted and resolved according to the Annenberg Center for Health Sciences at Eisenhower policy. The Annenberg Center for Health Sciences at Eisenhower is committed to providing its learners with high quality CME/CE activities and related materials that promote improvements or quality in healthcare and not a specific proprietary business interest of a commercial interest.

Americans with Disabilities Act:

Event staff will be glad to assist you with any special needs (ie, physical, dietary, etc). Please contact Kaitlyn Rush prior to the live event at 202-659-0699 ext. 16 or kaitlyn@aahivm.org.

There is no fee for this activity.
